Why This Workshop

Industry 4.0 Topics

From Design Thinking to Biomedical and A.I., we teach latest topics which are relevant for the future, giving students a wider exposure

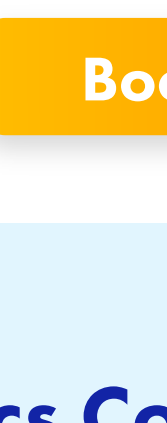

Build and Learn

All sessions are activity centric allowing students to learn experimentally than just theoretically

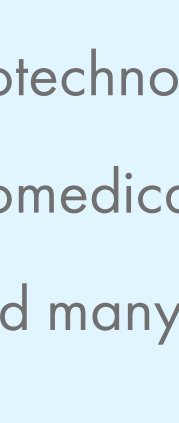

Personal Coach

Personal coach is always available for clearing your kids' doubts and preparing for all challenges

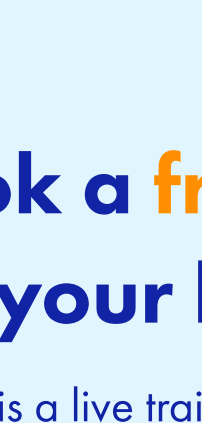

Super Mentors

We have well qualified subject matter experts who handhold the kids and make the topics fun and easier to understand

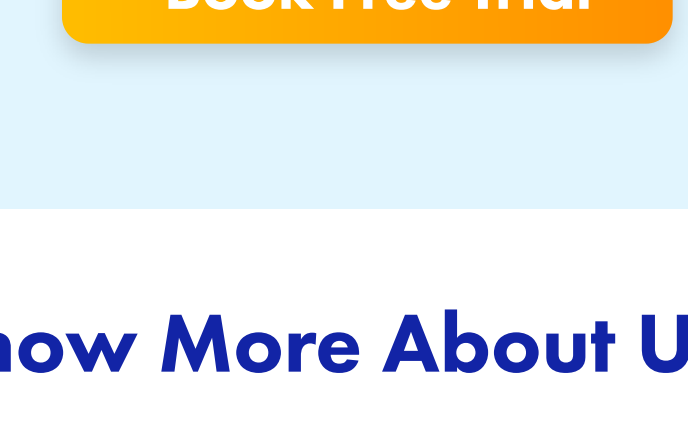

Innovative Challenges

Lots of Do It Yourself challenges and surprise sessions so that kids can unlock the genius within them

Capstone Projects

Opportunity to showcase what they have learnt at the end of each session by pitching a capstone project

Chance to be part of
Elite Moonshot Thinkers Programme

Feedback from Attendees

Mother of Athira,
Grade 7,
ToCH Public School, Cochin

Athira is really happy about the workshop. She willfully showed to continue with the sessions and hence I registered. Thank you.

Mother of Rithika,
Grade 7,
L'ecole Chempaka, Trivandrum

I saw during last ten days she was excited about the course and was ready at 10am with all pre-requisites, I don't see this excitement during regular school classes. She learnt amongst all topics what she likes best. Thanks to all mentors, I have seen the effort they have put into each and every child. I was really happy to see Rithika's presentation today

Father of Atul Naveen,
Grade 7,
Vyasa International School, Bangalore

The course was a complete package. This course gave him an idea about all topics and he was very excited. I think that the school also should incorporate such sessions, such activities so that concepts are absorbed better by the children.

Mother of Varun Balur,
Grade 7,
KLE's Society School, Nagarbhavi

The session were really good, especially the activities. Because It is very difficult to conduct such sessions online, as you need to be sure that all students have all materials but the coaches ensured that everything is ready. We also enjoyed the activities as parents, thank you for everyone who supported.

Father of Emma,
Grade 6

Emma was exposed to a lot of topics that she was not knowing earlier, it was interesting for her. We could see her excitement, we did not have to push her to come to class at 10am. Even I learnt new things being a part of this workshop.

F.A.Q

- How should participants prepare for this workshop ? ▼
- Is online workshop interactive or only one-sided? ▼

All our online workshops are highly interactive! Participants will not only enjoy live video and audio but also interact with the trainers, peers and coaches throughout the session. We know that there is no learning that can be achieved with a monologue.

- What if my kid is not able to attend the live workshop for a day? ▼
- Who will conduct the workshop? ▼
